

360° Outdoor Bluetooth speaker

IMPERIAL BAS 8

The IMPERIAL BAS 8 is an impressive Bluetooth loudspeaker not only thanks to its powerful stereo sound and compact design, but also owing to its versatility: it can also be used as a hands-free kit and FM radio and can be wirelessly connected to a further BAS 8 via TWS. A micro-SD card reader and an AUX connection expand the playback options. The solar panels integrated on the surface charge the battery of the BAS 8 even during operation,

thus extending the Bluetooth speaker's runtime. The speaker's housing is water-repellent and dust-protected, and thanks to a practical ground stake you can easily anchor the speaker in the ground. In short: the IMPERIAL BAS 8 is the ideal companion to enjoy your favourite music for lots of hours in the best digital stereo on a swimming trip or at a barbecue in the garden or in the park.

Highlights

- Bluetooth stereo speakers with 2x5W RMS power and passive bass reflector
- Bluetooth 5.0 (A2DP & AVCRP) with over 10m range
- Micro SD card reader (max. 64 GB) and AUX connector to playback music (cable included)
- True Wireless Stereo: wireless coupling of two BAS 8s to output separate audio channels (1 channel per speaker) for true synchronous stereo sound in first-class sound quality
- Integrated Bluetooth hands-free function & FM radio
- Robust, water-repellent and dustproof plastic housing
- 3.7V Li-Ion battery (1.800 mAh) with short charging interval and a running time of up to 6 hours
- Solar panels to charge the speaker during operation and in standby

Connections

- 1x Micro SD card slot (64 GB max)
- 1x AUX In
- 1x Micro USB (power supply)

Drachlose Kopplung zweier BAS 8 (TWS) für echten synchronen Stereosound in erstklassiger Klangqualität!
