

IMPERIAL[®] DABMAN 60 plus

DAB+ Radio

This is the perfect solution to upgrade your car HiFi system to digital radio reception. The digital radio signals are transmitted over a free FM frequency to your car radio. Furthermore, it is possible to transmit signals from external devices that are connected to the DABMAN 60+ via 3.5mm cable. The digital receiver is really easy to install: just plug it in the cigarette lighter and adjust the FM frequencies of your car radio and the DABMAN 60+. Another plus: with just 4 buttons, the DABMAN 60+ is intuitive to operate.
