The NOXON Journaline Mobile is created based on special requirements of visually impaired and it contains all the functions, which makes listening to radio enjoyable.

Further it is the first radio with news service Journaline, which is the teletext of digital radio. The teletext of the radio could not be read out by the text to speech function.

The NOXON Journaline Mobile is handicapped accessible (via usb stick for text to speech function)  
Text to speech function: Just download the software for the function text to speech from the website [www.terratec.com](http://www.terratec.com) for free and save it (unzipped) on an usb stick. Plug your usb stick into the usb port of the NOXON Journaline Mobile and the text to speech function starts automatically.

Digital Radio is the latest standard for radio reception via antenna. It takes analogue FM radio into the digital era. It offers a greater choice of programmes, new services, an excellent sound quality, simple operation and no search for frequencies. All these features can be enjoyed without any geographical limitation within a country.
