

IMPERIAL® BAT 1

Bluetooth audio transmitter for wireless transmission of audio signals to up to 2 Bluetooth devices (e.g. headphones, stereo speakers)

The Bluetooth-based IMPERIAL BAT 1 may be used to transmit audio signals from sources (e.g. TV sets, stereo systems) wirelessly to other Bluetooth-capable devices (e.g. headphones, speaker systems). Thanks to Bluetooth 3.0 technology and due to downward compatibility, it is compatible with most Bluetooth devices. Main advantage of the BAT 1 is the fact, that it may connect to up to 2 Bluetooth devices simultaneously - i.e. you can transmit audio signals from 1 source to 2 different terminals (speaker system AND headphones) at the same time. Powered by rechargeable internal battery that allows a playing time of up to 15 hours, the BAT 1's maximum transmission range is 10m.

Technical Details

- Powerful Bluetooth 3.0 + EDR transmission
- Downward compatible with BT 1.1, 1.2, 2.0 and 2.1
- Parallel connection for up to 2 Bluetooth devices (e.g. speaker system and headphone) with 1 audio source
