IMPERIAL® STREAMY 1

The IMPERIAL STREAMY ideal solution to embed your HiFi system into your home network! The small receiver is simply connected to your HiFi set via optical or analogue audio output. After a few moments of configuration (Apps for Android and iOS as well as Windows software available for free), network connection is established and voilà: the STREAMY is ready to go! Being compliant to several play-back standards (e.g. AirPlay, DLNA, UPnP), the small receiver supports a variety of mobile devices. Another plus: the IMPERIAL STREAMY may be used as stand-alone web radio receiver, upgrading your HiFi set or active speaker system to web radio reception with little effort. By using several receivers in one network, the STREAMY may also be used to set up a multiroom solution, simultaneously playing back different types of music in several rooms.

Highlights

- Wireless high quality music and audio-playback from smart phone, tablet, PC and MAC
- Webradio mode via WLAN
- AirPlay, DLNA and UPnP compliant
- iTunes multiroom support
