IMPERIAL® BAS 2

The IMPERIAL BAS 2 is an extremely small-sized Bluetooth loudspeaker. Thanks to Bluetooth 4.2, the BAS 2 may be easily connected to other Bluetooth-capable devices (e.g. smart phones). Once connected, it can play back all music files stored on the connected device as well as streamed audio files. Volume and title selection can be controlled via the connected device (e.g. MP3 player mode on smart phone) or via the buttons on the BAS 2. By using the internal micro SD card reader (supports SD cards with up to 32 GB storage), the IMPERIAL BAS 2 may be used as stand alone MP3 player. The internal mike allows to use the small Bluetooth speaker's phone mode which supports several functions. The BAS 2 may be powered by an external device (over mini USB - USB charging cable) as well as over the internal rechargeable battery. It is available in three different colors (white-silver, black-silver or red-silver).
